Message:

Mr. Mauldin,

If there is a 2-way communication with any number of satellites in space, you would have to provide the name of those satellites. If you haven't determined which satellite is being used, I would suggest to make that determination. We cannot authorize an experimental license not knowing where the antenna is aiming at.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of March 04, 2021 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
