

Talon TACET AVIS Description:

Start Date: August 1, 2020

End Date: August 1, 2021

Explanation for License: Tower testing of Ka-band communications elements

Purpose of Operation: Raytheon will be conducting experimental communications test of the Aperture antenna. This will be a tower test between an experimental unit (aperture site) and a test tower located less than 300 meters away on an 80 foot (24 meters) tower.

Remarks: Tower testing required between August 1, 2020 and August 1, 2021. Follow-on testing will require OTA (over the air) communications between the aperture site and a TBD communications satellite at the same frequencies.
