

This Form 442 is being filed as an extension of our STA File Number 0546-EX-ST-2006. The equipment has not yet arrived and will not arrive until the end of this month.

The wireless equipment, manufactured by IQ Wireless of Germany, consists of one base station and four remotes. When married to our (REDCOM Labs) telecommunication switching equipment, it will form a point-to-multipoint wireless local loop (WLL) system. The objective of this license is to show compatibility between the REDCOM and IQ Wireless equipment using the V5.2 interface standard and to demonstrate WLL to the military and to rural civilian customers using REDCOM and IQ Wireless equipment.
