

Narration Statement

Redline Communications will be conducting a demonstration at WiMAX World USA using a 5MHz channel in the 2.5 GHz bandwidth. The demonstration will be performed within Redline's booth inside the conference center, where Redline will connect its base station to a remote radio module and sector antenna for the purpose of running applications between the two points.

WE have already applied to COMSEARCH for spectrum licensing at the show.

Antenna Information

High Band 2600-2700 MHz

Low Band 2500-2600 MHz

Frequency Tolerance: 110 Hz.

Power: 4W

File Number: 0417-EX-ST

Confirmation Number: EL391655
