Subject: Mobex Experimental License KM2XBS Renewal

Dear Mr. Huie:

182 n n 1

Mobex Network Services, LLC operates an AMTS system under CFR Title 47, Part 80 throughout the inland waterways of the Eastern United States. This AMTS system utilizes proprietary, obsolete, decade-old mobile and base-station radio equipment. Mobex Network Services has undertaken a program to test and evaluate modern, off-the-shelf mobile and base-station radio equipment to determine if this equipment can support new services while meeting or exceeding the operating requirements of the AMTS system. Successful testing will result in Mobex Network Services offering new services to its existing customer base while marketing services to a new customer base.

Mindful of the aforementioned, Mobex Network Services respectfully requests renewal of its experimental license, KM2XBS, to continue testing new equipment and services within the AMTS spectrum.

er-William - Regionet
