Subject: 1621-EX-ST-2016 pre-coordination data request

---

Message:

What is "MAG"? In the request "Prior coordination with the MAG is required for the frequencies 380.00000000 MHz-399.90000000 MHz requested in this application. " Was this answered in response 34846? Also, If I still haven't satisfied this request in response 34846, can I have more time than 12/16/16 to answer?

Your help is greatly appreciated...
