EXHIBIT 1

Reference item 4 (c).

The antenna types and gain used for the purpose of demonstration will vary depending on the requirements of the end users application. The antenna types could be either omni directional or directional with linear or circular polarization.

EXHIBIT 2

Reference item 6.

As in Exhibit 1 this will depend on the requirements of the end users application.

EXHIBIT 3

Reference item 10.

The purpose of this application is to demonstrate the use of microwave equipment for the transmission of video and audio signals from one point to another to those who in most cases have no experience in using microwave equipment for this purpose. This will increase the usage of the spectrum by those who currently are not be using it.
