Subject: Request for Info - File # 1601-EX-ST-2019

Message:

So, the proposed ERP indicated on your application is incorrect (shown 3 mW). The definition of ERP is a sum of output power and antenna gain. Now if antenna gain is 20 dbi with output power 0.5mW, the total ERP emitting from the antenna would be about 50 watts. Do you agree? If not, please submit a detailed calculation of intended ERP (output power + antenna gain).

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of November 13, 2019 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
