Subject: FCC file number 0542-EX-ST-2010

---

Message:

Mr. Trevino, I understand this is short notice and that there is no guarantee of having the experimental license provided before December 6th. I submitted as soon as we were aware of the test. All effort on the FCC's part is greatly appreciated. Future submissions will be submitted 20 -25 days prior.

This will be a test of the Prepositioned Expeditionary Assistance Kit. The cellular portion of this kit will be tested with the other components of the kit to ensure all aspects can perform together as expected. The other components being power distribution and water purification.

Thank you,

Dan Perez
