RE: Application for HF Experimental License

Gentlemen:

Rockwell Collins hereby submits the attached application for an experimental license. This license, if granted, will be used to support the development of software and test of software for the High Frequency Data Link (HFDL) function of the HFS-900D HF Receiver/Transmitter (Transceiver). In particular, the license would be used to communicate on various HF frequencies with HFDL ground stations owned by Aviation Spectrum Resources Inc. Aviation Spectrum Resources Inc. has received FCC licenses (Call Signs WLK7, KNK9, WKF5, and KWC4) to operate these stations and has granted us permission to use the frequencies for HF data link testing. We request that the license be granted for a 5 year term because the experiment will not be completed within 2 years. We are providing three attachments (Attachment 1- Narrative Statement of Proposed Experiment, Attachment 2 – Aviation Spectrum Resources Inc. Letter, and Attachment 3 – Antenna Information). If you have any questions, please feel free to contact me.

Respectfully submitted,

John M. Giff
