November 19, 2020

Mr. Tom Voltero  
Office of the General Council  
Raytheon Corporation  
870 Winter Street  
Waltham, MA 02451-1449

Dear Mr. Voltero

Please accept this letter of concurrence from Aviation Spectrum Resources Inc. (ASRI) for use of the following frequencies associated with FCC experimental license WH2XNM:

131.550 MHz (13K0A2D)  
131.725 MHz (13K0A2D)  
136.700 MHz (14K0G1D)

Concurrence is approved for experimental testing by Rockwell Collins/Collins Aerospace to be conducted at 400 Collins Road NE, Cedar Rapids, Iowa. Purpose of the testing is to validate communication protocols and formats used by datalink equipment prior to deployment on actual aircraft.

This concurrence is conditioned upon the following:

- All emissions are limited to 15.24 W (ERP)
- SITA must be made aware of transmissions on frequency 131.725 MHz
- Only the emissions specified may be transmitted on the respective frequencies.
- There shall not be any harmful interference, or unnecessary traffic with detrimental performance effects, to existing datalink networks or adjacent frequency voice users because of this concurrence.
- Radios operated on the above frequencies shall only connect to existing datalink networks operated by currently licensed VHF service providers.
- An emergency stop contact is provided to affected users.

ASRI grants this concurrence provided that no harmful interference is created to other users. In the event of interference, ASRI may ask that Rockwell Collins Inc. cease operations. If you should have any questions regarding this matter, please contact me via email at [ccw@asri.aero](mailto:ccw@asri.aero) or a telephone number 410-266-6030.

Sincerely,

Christopher Wheatley  
Aviation Spectrum Resources Inc.
