Gentlemen:

Application is made herewith on FCC Form 442, with two Exhibits, to modify the referenced license to add frequencies in the 900MHz band to expand the experimental program in connection with an Advance Railroad Electronics System applicable to the Advanced Train Control System.

An agreement has been executed with the Association of American Railroads for use of the frequencies in this program, as shown in Exhibit 2 attached to the application.

Your early consideration of this matter will be appreciated.

Sincerely,

Rockwell International Corporation
