To Whom It May Concern:

This is to certify that:

Ruckus Networks is a manufacturer of radio frequency equipment (WiFi access points).

The RF experimentation will be conducted by following a strict Test Plan defined and approved by Ruckus Networks in a controlled environment.

Ruckus Networks will have a Project Manager in place to specifically follow the Test Plan, track results, and publish test results.

Ruckus Networks has extensive RF experience and expertise with over 10 years developing and commercializing dozens of RF products and has a significant number of RF engineers on permanent staff.

For the above reasons, I believe Ruckus Networks meets the Eligibility criteria for an Experimental License as set forth in the Commission Rules.

Sincerely,

A handwritten signature in dark ink, reading "Juan C. Santiago." The signature is fluid and cursive, with a large initial "J" and a distinct "C" for the middle name.

Juan Santiago | Director of Product Management, Small Cells
