

Federal Communications Commission
445 12th St, SW
Washington, DC 20554

Dear Sir or Ma'am:

In connection with an application to the Federal Communications Commission ("**FCC**") to use the Citizens Broadband Radio Service ("**CBRS**"), Golden One Center ("**G1C**") certifies that:

1. G1C is hiring a contractor, XCOM Labs, Inc. ("**XCOM**"), which deploys and manages radio frequency equipment.
2. The RF experimentation at G1C will be conducted by XCOM following a test plan defined and approved by XCOM in a controlled environment.
3. XCOM will have a project manager designated to specifically follow the test plan, track results, and publish test results.
4. XCOM has extensive RF experience and expertise deploying RF networks and has a number of RF engineers on permanent staff.

For the above reasons, G1C thus believes that it meets the eligibility criteria for a special temporary authority experimental license as promulgated under applicable FCC regulations.

Sincerely,

Noel Domine

Network Engineer
