

Application for Special Temporary Authority

Safari Telecom, Inc. / PGA TOUR

Safari Telecom, Inc. and PGA TOUR are seeking permission to test a system operating within the FCC-CBRS range, that can potentially be used at major golf events with upwards of 50,000 attendees per day that can support public safety, scoring, and broadcast. The system will also allow the ability for additional cameras, surveillance and recognition software, which are very useful for large challenging outdoor venues such as professional golf tournaments. Homeland security, state and local police, FBI and other law enforcement and public safety groups rely on multiple options to securely communicate via audio, data, and video when standard communication options such as cellular telephones often deteriorate during large scale events.

A stop-buzzer contact for all Safari Telecom/PGA TOUR operations pursuant to this STA application will be Hien Nguyen, who can be reached at 908-433-5700. Also, undersigned person for the applicant can be used as an additional stop-buzzer contact at 201-258-0101.

David Baron

A handwritten signature in black ink, appearing to read 'David Baron', with a stylized flourish at the end.
