Mr. Burtie:

Earlier this week you sent a letter canceling or STA.

What process do we do to get it reinstated, now that we are able to accomplish your requirement for EAS "blackout areas"?

Is a new application required?

Also, several entities are anxious to contact the FCC to show their support for our technology.
Is that something you see as helpful to our cause? (I do not want to inundate your office with "file fillers" needlessly).

We look forward to working with the you and your organization to provide a small portion of the All Hazard Alert System our country so desperately requires.

We WILL fulfill ALL of your requirements as they become known to us.

Thanks you for your ongoing cooperation.

Regards,
Mark
