Message:

You provided earth station receiver parameters in your last correspondence. What is the location of this earth station (city, state and coordinates) and will it be transmitting to the space station? If so, you will need to provide transmit information unless this station is already licensed to transmit. This information includes frequency, output power, ERP, bandwidth and emission. If it is transmitting, and the parameters are the same as the earth station in your other application, 0418-EX-PL-2013, let me know and I can retrieve the information from that application.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 25, 2013 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
