Subject: Request for Info - File #0279-EX-PL-2013

---

Message:

The request was to explain the difference between the Earth station parameters on applications 0279-EX-PL-2013 and 0418-EX-PL-2013.

The difference is that the parameters given in 0418-EX-PL-2013 were for the transmit antenna (19G021B000-360A00150H005), while the parameters for 0279-EX-PL-2013 were for the receive antenna (16G030B000-360A00250H015). The receive antenna parameters were requested in the previous correspondence.

The difference in antenna elevation appear to be a clerical error -- 0418-EX-PL-2013 uses the general elevation for St. Louis and does not account for the height of the building upon which the antenna is located.
