Subject: Request for Info - File # 0047-EX-ST-2019

Message:

Greetings Doug

We are requesting an extension of the Call Sign: WM9XSL license for the second time and planning to conclude our trail/performance testing on 04/14/2019.

We have originally submitted this application on January 29th 2019, immediately after the federal shutdown when the FCC online service portal re-open . Following was the STA Confirmation Number: EL687297, STA File Number: 0047-EX-ST-2019 and Date of Submission: January 29, 2019.

Some reason the application status was showing the incomplete status until yesterday and have re-submitted the application yesterday .

City and County of San Francisco would like to conduct some additional LTE performance study for traffic signal and video applications. It will be great if FCC could extend the experimental license (Call Sign: WM9XSL) until 04/14/2019.

If the experimental trial successful, City and County of San Francisco will apply for the regular experimental license on Form 442.

Please let us know if any additional information .

Thanks
Shome Vasudevan
