Subject: Request for Info - File # 0943-EX-ST-2021

Message:

Hi Douglas,

Here is a bit more background on the satellite and the operations.

The satellite is not licensed in the US.

It's called 3B5GSAT (NORAD 47691) and has been registered under the UK authority.

The ITU filing for the payload is SATELIOT_UHF from Spain, notice id 120520046 published in Special Section CR/C/5288 in IFIC2928.

The TT&C are made from SvalSat, a satellite ground station in Svalbard, Norway and operated by Kongsberg Satellite Services (KSAT). The GPS coordinates are 78°13'47.18"N 15°24'28.03"E

Stop buzzer PoC is Maria de Quadras (maria.dequadras@sateliot.space), +1 505 404 0739

The purpose of this experiment is to validate the design of the terminal, the satellite and the whole chain.

Happy to provide any further information deemed necessary.

Best
