Subject: STA File No. 0070-EX-ST-2003

Carl,

Thank you for taking the time to follow up on our application for experimental license number 0070-EX-ST-2003.

I reviewed the station emission instructions contained in Part 2.201 sub part C emissions as you suggested and have amended our application to reflect an OFDM type carrier with multiple channels carrying data.

We would like to move forward with the processing of this application even though we believe our products will operate within the constraints of Part 15.

Please let me know if there is any additional information required for our application.

Thank you for your assistance,

Dave
