Scott Knox

June 30 2012

I respectfully request a change of operational frequency from 512-542 MHz to 488-518 MHz. I feel this change will better accommodate my experiments objectives by helping to assure that no interference is caused to a local broadcast incumbent with operations on UHF channel 23, and would better adhere to the commissions channel plan as set fort in the Second Report and Order..

Thank You,
