John,

I would like to follow up with a few things regarding our license request.

- We request the experimental license for five years in order to work on the Coastal Ocean Current Monitoring System (COCMP) funded by the State Coastal Conservancy.
- Manufacturer: CODAR Ocean Sensors, SeaSonde; Model Number: SSTX; No. of units: 22
- Equipment is non-experimental (commercial off the shelf equipment from CODAR Ocean Sensors)

Best Regards,
 Lisa

Hi John,

Sounds good. Let's move forward with a partial grant and then we will modify the locations that did not get approved or add any frequencies that we not listed.

All the best,
Lisa

At 05:32 AM 1/9/2006, you wrote:

Actually, the frequencies below are practically ready to go. I did notice that Point Conception didn't make it to the list. Since so many have been accepted and knowing how difficult it is to process some requests, I would accepted what was granted so that I could at least start operations with what I have, then submit a modification for additional requests later if necessary. Nevertheless, you are free to request what you wish, but I can give no guarantees that a request will be accepted nor do I know when.

John,

Thank you so much for looking into our request. I just want to go through the list to see which ones made it and which ones did not. I'll send a response on Monday, but most likely will go forward with a partial grant. If there are some sites listed that we would like to change frequencies on should I just have those removed from the partial grant?

I can't tell you how much I appreciate your assistance!
Best Regards,
Lisa
