Subject: Request for Info - STA File #0674-EX-ST-2013

Message:

1. Provide a more specific description of location. If this is truly mobile, the best method would be center coordinates with a radius of operation.
2. Give a detailed explanation for the wide frequency request. Experimental applications should request the least amount of spectrum necessary to accomplish the goals of the experiment.
3. What part of the FCC's rules will this equipment be authorized? Will it be under Part 15, Radio Frequency Devices? Many low-power operations can be operated without need for an experimental STA or license. See 47CFR2.805(d) and (e)(2).

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 16, 2013 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
