Question 4

Sensis is current providing support to several FAA Programs to improve the safety of civil aviation transportation in the US and other countries. The ASDE-X Precision Runway Monitor Program and ITT's Surveillance Broadcast Services are two of the FAA program that we are currently supporting.

The FAA has also contracted Sensis to integrate into ASDE-X the capability to receive and multilaterate on transmissions from the 978 MHz Universal Access Transceiver (UAT) data link. Sensis is developing a UAT Receiver that will be integrated into Remote Units which are placed at strategic positions around the airport surface. This contract number is DTFA01-01-C-00011.
