

File No. 0332-EX-PL-2005

Exhibit 5

The Terma radar is a component of the Sensis' Airport Surface Movement Guidance and Control System (ASMGCS) that is sold for various airport surface management contracts outside the United States. The system is a surface movement radar and is the US equivalent of the FAA ASDE-X program. The unit at Syracuse Hancock International Airport is used for system development, test, integration and product support. The current customer is the Airport Authority of India, the contract number is AAI/PO-01/ASMGCS/2004-CNS(P).
