

Exhibit A - Question 5: Description of Foreign Government Use

Sensis has two contracts with the General authority of civil aviation of the Kingdom of Saudi Arabia. One is the Dammam KFIA contract number 003-2007 and the other is Jeddah KAIA contract number 1-ANS-2008. Both of these contract are to develop a Wide Area Multilateration system that requires the use of the transmitter under development. Australia and Canada have also expressed interest in this WAM technology and we hope to develop systems for their use in the future.
