

The purpose of using this frequency is to perform some testing inside our Boca lab for GSM (Global Switch for Mobile network). We will then be showing a demo of this equipment in the Orlando Convention center on March 18 – 22. The purpose of the testing is verification of EDGE and GPRS at these frequencies for experimental demos only using Siemens Equipment.

I need:

Authorization to use these frequencies in Boca Raton Lab starting March 1/2002.

Technology demo in Orlando Convention Center starting March 18 – 22.

I need these frequencies for a short time to carry out these tasks.

Best regards

Avtar Singh Manager Siemens BSS
