

Information about the W-BTS for TDD

Frequency Range:

- 2015 - 2020 for Uplink and Downlink direction

Output Power:

Used output power 1MW

Emission Designation:

5 MHz bandwidth is used.

Emission Designator is:
05M0F7E

License Required by:

We are expecting the equipment to arrive in our labs in Boca Raton by 5th March 2002.
We will appreciate if we can have the authorisation to use the required frequencies by that time frame.

As always, we are much obliged for your prompt response and also very much appreciate the help you have provided us in this matter.
