

EXHIBIT A

Additional Frequencies Required

C-Band	1895-1910/1975-1990 (MHz)
D-Band	1865-1870/1945-1950 (MHz)
E-Band	1885-1890/1965-1970 (MHz)

Power Replacement

Instead of 800mW (ERP) we require 13W (ERP)

Additional Location

Instead of a local license, we require the licensee to be a nationwide experimental license, this should include Puerto Rico.

This nationwide license is required because we have customers who are approaching us to go into their area to do field trials.

EXHIBIT B

Siemens Stromberg-Carlson in conjunction with partner companies is a manufacturer/developer of a PCS system..

Siemens Stromberg-Carlson is currently working with several customers to provide equipment that will give the customer a working PCS system called PACSEdge. Some of these potential customers (including one in Puerto Rico and one in the US Virgin Islands) are requesting that we provide a field trial prior to committments, hence the request for the nationwide license.
