

Exhibit for File #0073-EX-PL-2014

Government Project: The Airborne Tracking System (ATS) for the ISR Aircraft

Agency: Big Safari

Contract No: FA86210-11-G-4020, Order No. 0055

Narrative Statement: The experimental ATS is a scanning sensor that is intended to track radar to provide situational awareness during mission operations. Test platforms include being attached to a building, atop/in a van, and ultimately on board a RC-135 aircraft.
