Subject: FCC file number 0212-EX-ST-2012

Message:

Mr. Trevino,

With regards to your comments regarding our application for an experimental license, SSC agrees that the start date of the testing be changed to 13 April 2012 with the end date of May 30, 2012.

SSC is aware that the confidentiality fee is an additional \$60 and we have paid a total of \$120 for this application.

We realize that the antenna frequency and emission information will not be made confidential, but the exhibits may be made confidential. We have submitted attachments called:

SSC_Confidential_Justification_Page_1.jpg

SSC_Confidential_Justification_Page_2.jpg

which explain our reasons for confidentiality and addresses the statements in 47 CFR, Part 0.459(b)1-9. The reason for the JPEG format is that the FCC website would not recognize our Adobe PDF format for the text documents.

The titles of the exhibits that need to be confidential are the SSC_Explanation_Details.jpg and the SSC_Purpose_of_Operation_details.jpg. Once again these items are JPEGs since the website doesn't recognize our ADOBE PDF format. A detailed description of our operation is described in the SSC_Purpose_of_Operation_details.jpg.

If you haven't received these documents as part of the application process, I can upload them again.

Regards,
Larry Riddle
