

Request for Expedited Processing

In reference to application 0046-EX-PL-2006

SignalSys, applicant for an Experimental Authorization already assigned file number 0046-EX-PL-2006, hereby requests Expedited Processing of this application.

The need for expediting this application has arisen due to unexpected, early demand from the broadcasting industry for demonstrations, at various regional events, of the SignalSys training program for Digital Electronic News Gathering (D-ENG) technology. (For details of the training program, which will make use of low-power microwave transmission indoors, on a non-interference basis, in the 2 GHz Broadcast Auxiliary Service band [2025 MHz to 2110 MHz], see the Narrative Description Exhibit associated with this application.) Evidence for this claim includes planned presentations at the Great Lakes Broadcasting Conference and Expo in Lansing, MI, March 13-14; and at the annual convention of the National Association of Broadcasters in Las Vegas, NV, beginning April 23, 2006.

Respectfully submitted,
s/ David Otey, Technical Contact
