Application Narrative for Proposed Equipment

Proposed Program

Silverhawk Aviation is proposing GPS within their aircraft facilities for testing purpose.

Objectives

We seek to accomplish the following objectives:

1. Illumination of the part of the aircraft hangars, located at 1751 W Kearney Ave, Lincoln, NE with a GPS signal to allow for the testing and experimentation indoors for continued exploration of utilizing GPS technologies within their aircraft to provide innovative applications and continue to provide safe products.
2. Further design, development and enhancement of existing GPS applications to provide greater efficiency and more effective means of utilizing GPS derived information.
