To operate in the 2360-2390MHz Telemetry Band in Los Angeles, California.

ATTN.: Microwave Branch

Silvus Technologies, Inc., hereby requests Special Temporary Authority (STA) to operate within the 2360-2390MHz telemetry band pursuant to Section 21.25 of the Commission's Rules. Silvus Technologies, Inc. requests that the Commission grant it temporary authority to operate on the frequency centered at 2385MHz with a 5MHz bandwidth from April 03, 2017 through May 31, 2017 with intermittent usage. As explained below, Silvus Technologies, Inc., is filing an STA request to demonstrate data coherency in a MIMO configuration. Silvus Technologies, Inc., submits that there are extraordinary circumstances warranting a grant of the STA request.

The United States Air Force Research Laboratory has invited Silvus Technologies, Inc., to demonstrate new microwave technologies with regard to data coherency. Due to the extreme frequency congestion in the Los Angeles area, coupled with the added congestion from traditional Television and News coverage of area events, Silvus Technologies, Inc., requests the use of this channel.

Silvus Technologies, Inc., certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA for the 2.3GHz band would serve the public interest by enabling Silvus Technologies, Inc., to demonstrate the reliability of their emission scheme as it relates to receiving consistent data packets. The proposed service would enable a demonstration of the Streamcaster SC3500 transceiver / antenna array in a airborne exercise. Silvus Technologies, Inc is in the process of obtaining the consent of the relevant frequency coordinators for this project, including AFTRCC. AFTRCC has indicated its intent to forward the results of the coordination to the Commission.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:
