Subject: 1282-EX-ST-2026 pre-coordination data request

---

Message:

In response to the Commission's correspondence requesting FAA coordination for the 500 to 1023 MHz frequencies in this application, Sine Advanced Engineering has submitted a Frequency Coordination Request to FAA Spectrum Engineering Services through WebFCR. The request was successfully submitted and is under FAA review; the FAA's stated goal is to address the coordination within 30 calendar days. The FAA assigned tracking numbers TRK 261179 through TRK 261242 covering the 500 to 1023 MHz request at Playas, NM (32 frequencies, airborne and ground records). The FAA's submission confirmation is attached. We will provide the completed FAA coordination to the Commission as soon as it is received. Please let us know if any further information is needed in the interim. Benjamin Soanes Sine Advanced Engineering bsoanes@sineeng.com · 915-259-6548
