Subject: Request for Info - File # 1282-EX-ST-2026

---

Message:

Yes, the filing includes airborne operations involving unmanned aircraft systems. Airborne transmitters may include the Sine.link command, control and telemetry system and the Sine Video.Beam video system listed in the application. The maximum planned flight altitude is 400 feet above ground level (AGL). Operations will occur within the approved EXTiC operating area near Playas, New Mexico. Thanks, Ben Soanes Sine Advanced Engineering File Number: 1282-EX-ST-2026 Correspondence Reference Number: 103916
