Hi Juan,

Please request that the applicant confirm whether their filing involves airborne operations. If airborne operations are included, instruct the applicant to provide the maximum flight altitude.

Thank you,

Naheed

Subject: RE: Coordination File. no: 1282-EX-ST-2026 (EXPIDITE)

Are the frequency ranges correct?

Frequency range 500 MHz to 950 MHz is over 450 MHz difference with only a 500 kHz bandwidth.

Also, the range between 2.150 MHz to 2.300 kHz must be a typo and does not have an emission listed. Most likely 2150 to 2650 MHz.

Please confirm the frequency bands and emissions.

Station Locations

Playas,HIDALGO,NM- NL 31-57-50; WL 108-31-05; MOBILE: Within Playas Training Area, Playas, NM, within 20 km , centered around NL 31-57-50; WL 108-31-05

Frequency	Station Class	Emission Designator	Authorized Power
