

Exhibit A: Request for Expedited Processing

SkyRiver Communications hereby requests expedited treatment of this application for experimental authorization. Specifically, SkyRiver asserts that expedited action by the Commission is necessary to ensure that SkyRiver's proposed experimental services may be deployed without delay and that a substantial portion of its trial is completed prior to the adoption of any changes proposed during presently conducted Reconsiderations by the Commissions for the possible use of unlicensed devices in the 3.65 GHz band.

SkyRiver has already placed an order for the purchase of the equipment described in this application, and is prepared to immediately execute leases on buildings and rooftops necessary to commence experimental operation. As a result, a lengthy processing delay would not only be detrimental to SkyRiver's proposed experimental operation, but would also harm the public. As explained in the instant application, SkyRiver seeks to demonstrate, through experimental operation, that the 3.65 GHz band is suitable for the operation of unlicensed devices, both inside and outside areas which could be deemed "precluded" by rules proposed by the FCC. Because the Commission is currently reconsidering such rules for the 3.65 GHz band, time is of the essence to ensure that SkyRiver may immediately commence its experimental operation and have time to report back to the FCC on its findings prior to final establishment of rules relating to the 3.65 GHz band. Accordingly, an expedited grant of the instant application is necessary and the public interest.
