John,

We have confirmed that the 31.6 watts peak ERP for the band 1657.5-1658.75 MHz is for a mobile terminal, not a fixed terminal. The power associated with that user terminal, which is not a handset, is necessary for transmissions to MSV's MSAT satellites and is consistent with transmission EIRPs of authorized MSV terminals in use with those satellites. See Call Signs E930367, E980179, and E990133.

Please contact me if you have additional questions.
