

Exhibit – Description of Application

In accordance with the Commission’s Rules, Mobile Satellite Ventures Subsidiary LLC (“MSV”) hereby submits this application for an experimental license for authority to continue the Ancillary Terrestrial Component testing authorized under FCC File No. 0309-EX-ST-2007, call sign WC9XYO. The OET granted that application for a period of 6 months, expiring on March 2, 2008. However, MSV has not completed its testing and, accordingly, seeks authority for an additional twelve months (in an abundance of caution) to complete the proposed testing. MSV incorporates by reference its prior statements and exhibits detailing the technical parameters of the testing. See File No. 0309-EX-ST-2007.
