Hi John,

Thanks for your help in this matter.

As I mentioned yesterday, we are in the process of looking at a different location to perform our radiosonde flights therefore we may not require the use of this experimental license. At any rate, what you have written in your email is essentially correct with one exception. We may want to fly two AM or two KL sondes attached to separate weather balloons, that is a max of two weather balloons in flight at one time, but any combination of AM or KL sondes. i.e. AM-AM or AM-KL or KL-KL.

Please let me know if you need further clarification.

Thanks,

Travis Bruns

Importance: High

Dear Mr. Travis Bruns:

Pursuant to our telephone conversation yesterday, January 12, 2006, please verify that no more than two transmitters will be transmitting during an experimental trial (one Vaisala RS92-KL and one Vaisala RS92-AM each attached to separate weather balloons) and that approximately three experimental trials will be performed on any given day. Furthermore, since these non-experimental transmitters are on weather balloons that are not retrievable, a total of sixty Vaisala RS92-KL and sixty Vaisala RS92-AM have been requested for use throughout the duration of this experiment.
