Date of Original Email: 09/17/2020

1. Please delete the RF Bands 969-1206 MHz and 1350-1390 MHz from the original STA request due to the time required to coordinate with the FAA and the lack of knowledge on how to coordinate with the FAA on such matters. Sent the request in last week, no response yet, unlike the FCC which the response has been pretty good, thank you for that.

2. Please correct the test site location. The correct Test Site coordinate center is:

AFRL Stockbirdge, NY Radio Tower Site

43° 1' 58.99"N 75° 38' 58.43"W

The original LAT / LONG were provided by AFRL.

The STA application on-line software is pretty bad. Must be mid-90s work.
