Message:

Hello Mr Young,

Thak you very much fro your quick review of our aplication.

1- Ok, the start date would as soon as possible. We don't know yet our precise date of arrival in the USA. Nevertheless, the sonner the better. I understand that 15 days minimum would be required to process this application.

2- Concerning the location, I will amend the application with the known location data. We know we will go in Phoenix and NYC JFK airports, so that's easy to set a center point and a range. But for other locations in the middle of the USA, the exact flight path and route will be defined according to weather, ATC and energy constraints, therefore we don't know yet the exact location where the Solar aircraft will be.

2 as well - Concerning the altitude, we will only emits from the ground.

Again, thank you very much for your advices.

Nils RYSER
