Subject: Request for Info - STA File #1261-EX-ST-2015

Message:

Dear Sir or Madam:

Soundtronics requires STA to test/demonstrate prototype equipment at imminent, high-profile productions, including Grease: Live, which will be broadcast and streamed worldwide from Burbank on January 31, 2016, and for which Soundtronics is a part of the production team.

Soundtronics continues to study its need for authority to test, demonstrate and evaluate prototype equipment in the 944-952 MHz and other radiofrequency bands. Additional experimental authority (STA or long-term) for the 944-952 MHz band may not be necessary or requested depending on a number of variables, including whether Soundtronics can modify existing Part 74 licenses in the near term to reflect the 944-952 MHz band, and the extent to which major microphone manufacturers involve Soundtronics in the evaluation of future prototype wireless microphones.

To the extent you have any further questions or concerns, please feel free to contact the undersigned.

Best regards,
Tim Bransford
