

STA File number: 0005-EX-ST-2009

STA Confirmation number: EL635854

---

Supplementary explanatory note:

In this STA application 2 antenna registrations have been submitted. One relates to the base station and one relates to the outstation.

The application also indicates that there is one base station and 70 outstations. So the antenna registration for the outstation is representative of each of the 70 outstations. Also in the antenna registration part, the outstation is described as “mobile”. Strictly, in this application, each outstation is a device installed on a street light, so the 70 outstations are actually static. The reason the antenna registration is added as “mobile” is so that the 70 outstations can be treated as operating with 2km of the base station.
