Ref: File # 5866-EX-MR-97

Sir:

Following this page is a requested amendment to SBTR's application to add new frequencies to it's experimental license. The amendment limits the geographical area of proposed testing, specifies maximum power and bandwidth of the signals, and specifies technical testing only. The amendment is a result of your conversation with my supervisor, Roger Thompson.

If there are any questions please call me at the above number.

Thank you,

Mark McAllister
