Subject: NOAA Commercial Remote Sensing Regulatory Affairs License Inquiry

Dear Dr. Wexler and Mr. Miller:

Pursuant to 15 C.F.R. § 960.5(a), the National Oceanic and Atmospheric Administration's (NOAA) Commercial Remote Sensing Regulatory Affairs (CRSRA) has reviewed your Initial Contact Form, submitted on July 19, 2025 concerning the proposed CTC-1A-C system ("the system"). Under the authority of the Secretary of Commerce under 51 U.S.C. § 60101 *et seq.*, as delegated, and 15 C.F.R. Part 960, we have determined that the system as described in your Initial Contact Form does not fall within the Secretary's jurisdiction and therefore does not require a NOAA license. This determination was made based on your representation that the system is not capable of remote sensing as defined at 15 C.F.R. § 960.4.

If the factual circumstances of the information provided change, please submit a new Initial Contact Form, as you may be subject to the Secretary's jurisdiction. Additionally, please contact CRSRA with any future systems you may plan to operate in order to obtain a licensing determination on that specific system and its mission.

Please refer any questions regarding this determination by email to CRSRA@noaa.gov.

Sincerely,

Sarah C. Brothers, Ph.D.
Director, Commercial Remote
Sensing Regulatory Affairs
