Subject: Request for Info - STA File #0521-EX-ST-2016

Message:

1) As previously noted, SpaceVR's uplink needs for this CubeSat will be handled exclusively by contractual arrangement with Atlas Space Operations, Inc. The only Atlas Earth station within FCC jurisdiction is located in Brewster, WA, USA. A copy of the experimental license for that station has been uploaded as an attachment exhibit to this application.

2) A modified ITU SpaceCap filing that addresses all issues has been uploaded to:
http://www.southernstars.com/files/spacecap_v7.mdb

3) A copy of SpaceVR's NOAA Earth-Imaging License has been uploaded as an exhibit to this application as well.
