

If you are using a COTS quadcopter that has been authorized for sale in the United States under the FCC's Part 15 rules (47CFR15), then you do not need a license from us to transmit. There should be an FCC ID somewhere on the equipment. It may even say something about Part 15 on it or the literature accompanying it would. If you have the FCC ID, you can look up the equipment authorization at <https://apps.fcc.gov/oetcf/eas/reports/GenericSearch.cfm> and it would tell you if it is authorized under Part 15 or some other Part of the FCC's rules. Let me know what you find out and whether you still need me to process your experimental license request.

Doug Young Electronics Engineer Federal Communications Commission
Experimental Licensing Branch Phone: (202) 418-2440 Fax: (202) 418-1918
Email: Douglas.Young@fcc.gov

After the following communication with Doug Young at the FCC, I realized I do not require an experimental license for the quad-copter test. Due to this change in understanding of requirements I wish to cancel the application submitted on May 26, 2016 (file number 0376EXPL2016, confirmation number EL176644). I apologize for any inconvenience and would like to thank you for your patience and assistance through the application process.
